

Summer Math Practice Log for Rising Sixth Graders

Please take time weekly to practice math skills. About 30 minutes of review and practice time each week is recommended for your grade level. Complete the log each week by writing the skills you practiced and putting an “X” to show your method of practice. We understand that some weeks may be blank due to vacation times. Return this signed form to your teacher.

Week	Skill Practiced	Website or App (X)	Workbook or Sheets (X)	Flashcards (X)
