

SUMMER MATH 2018
Rising 7th Grade Students

TO THE STUDENT:

Your summer math program this summer involves reviewing key arithmetic topics as well as learning about Khan Academy. Khan Academy is a great resource to use independently during the school year when you feel you need a bit of help in any area of learning or when you just want to learn more about a topic. Khan is free and offers instructional videos and practice problems covering a wide range of topics.

Trinity Christian Academy uses Khan Academy for its summer math program at the Upper School. For summer math this year, you will use a parent's email address to sign onto Khan Academy and will work on the arithmetic topics listed below. A record must be kept of the topics covered, signed by a parent, and turned your teacher on AUGUST 22, 2018.

TO THE PARENT:

Your student will need your email address and your assistance getting started at Khan Academy. I have pre-selected the topics your student MUST cover. You may cover additional topics, but the topics pre-listed are a must for your child to cover. The address for Kahn Academy is www.khanacademy.org Please sign next to the topic of review, indicating your child has finished that portion of the requirement.

STUDENT NAME: _____

Topic:	Parent Signature:
FRACTIONS	-----
Adding and Subtracting Fractions with Unlike Denominators	
Adding and Subtracting Mixed Numbers with Unlike Denominators	
Multiplying Whole Numbers and Fractions	
Multiplying Mixed Numbers	
Fractions As Division	
Dividing Unit Fractions by Whole Numbers	
Dividing Fractions by Fractions	
DECIMALS	-----
Rewriting Decimals as Fractions	
Adding Decimals	
Subtracting Decimals	
Multiplying Decimals	
Dividing Decimals
